### **About Xilio Therapeutics**

Xilio Therapeutics is a clinical-stage biotechnology company focused on harnessing the immune system to achieve deep and durable clinical responses to improve the lives of patients with cancer. The company is using its proprietary geographically precise solutions (GPS) platform to rapidly engineer novel molecules, including cytokines and other biologics, that are designed to optimize their therapeutic index. These molecules are designed to localize activity within the tumor microenvironment without systemic effects, resulting in the potential to achieve enhanced anti-tumor activity. Xilio is building a pipeline of wholly owned, tumor-activated product candidates, including its clinical-stage programs, XTX101, a tumor-activated anti-CTLA-4 monoclonal antibody, and XTX202, a tumor-activated IL-2, as well as its earlier pipeline, including XTX301, a tumor-activated IL-12.
